WORK EXPERIENCES

Senior Associate Back-End Engineer

Arise by INFINITAS

08/2025 – Present

- Served as Sub-Lead, managing a development team to deliver software according to strict financial industry standards and project timelines.
- Architected Digital Core Banking solutions using Thought Machine (TM), developing core logic in Python 3 with high-performance Go wrappers.
- Engineered real-time data streaming pipelines using Apache Flink (Java) to integrate the core banking system with internal components, ensuring 100% data consistency.
- Developed scalable event-driven services using Go for routine processing and AWS Lambda for serverless triggers and optimizing system responsiveness.

Associate Back-End Engineer

Arise by INFINITAS

04/2023 – 07/2025

- Developed microservices and backend logic using the Java and Kotlin Spring Boot frameworks to support enterprise software requirements.
- Managed software containerization and deployment across Kubernetes clusters, maintaining parity between on-premises infrastructure and cloud environments (GCP, AWS).
- Collaborated on CI/CD pipeline improvements to streamline the delivery of Spring Boot applications into production environments.
- Executed bug fixes and feature enhancements, contributing to the overall stability and scalability of the software that team managed.

Junior Software Developer (Cooperative Internship)

CPF IT CENTER CO., LTD.

11/2022 – 03/2023

- Develop new application (Back-End, not published at this time) using .NET Core 7.0 with many frameworks (such as Entity Framework, MediatR etc.), PostgreSQL database, and Elasticsearch.

Teaching Assistant

PRINCE OF SONGKLA UNIVERSITY

11/2020 – 03/2023

- Assist instructor on Programming class preparation and student coaching during C/Python laboratory sessions.
- Grade student assignments.
